Maternal contact with healthcare services, within a child's contact with midwives, to follow up on the child's health monitoring from health visitors. This early engagement and interaction between mothers and healthcare professionals, is important in developing accessible resources, networks, and supportive relationships, which mothers rely on whilst learning their new role and gaining mothering experience (Jack, DiCenso, & Lohfeld, 2005).

Although there are many health professionals in the community such as district nurses, speech and language therapists, midwives; for mothers, these services typically involve a general practitioner (GP) doctors, practice nurses and health visitors. Health visitors are budget holders, who decide the range of services available to meet the health needs of their patients (King's College London, 2019). Health visitors are registered nurses, who are usually directed to work within practices. The care they provide includes patient consultations, physical examination, and management of illnesses and ailments. More commonly seen by mothers are health visitors, who are registered nurses or midwives with an additional qualification as Specialist Community Public Health Nurses (Health Visitors). In the UK, they are the only nurses who have a specific role with young children and families, promoting positive health outcomes and prevention of illness (Peckover & Appleton, 2019). Health visitors have exclusive access to young families through early intervention programmes and home visiting, enabling them to identify health needs early (Bryar, Cowley, Adams, Kendall, & Mathers, 2017).

### Abstract

In everyday life, people seek, evaluate, and use online sources to underpin opinions and make decisions. While education must promote the skills people need to critically question the sourcing of online information, it is important, more generally, to understand how to successfully promote the acquisition of any skills related to seeking online information. This review outlines technologies that aim to support users when they collaboratively seek online information. Upon integrating psychological–pedagogical approaches on trust in and the sourcing of online information, argumentation, and computer-supported collaborative learning, we reviewed the literature ( $N = 95$  journal articles) on technologies for collaborative online information seeking. The technologies we identified either addressed collaborative online information seeking as an exclusive process for searching for online information or, alternatively, addressed online information seeking within the context of a more complex learning process. Our review was driven by three main research questions: We aimed to understand whether and how the studies considered 1) the role of trust and critical questioning in the sourcing of online information. 2) the learning processes at play when information seekers engage in

### Abstract

**Purpose** – The study aims were: (1) to replicate a previous study by the first author to confirm previous findings (internal validity) and to check construct validity of previously proposed information-behaviour profiles, (2) to compare the information processes used by students in parallel with requirements of early professional practice.

**Design/methodology/approach** – A replication study used the same questionnaire, delivered online to all 175 students across three years of a BSc adult nursing degree programme on one UK university campus. The survey included questions on information seeking processes, personality, approaches to learning and self-efficacy with information literacy. The literature review examined evidence around the transition from nursing student to practitioner and the Association for College and Research Libraries (ACRL) standards for nursing information literacy.

**Findings** – The response rate was 86/175 (49%). The result verified findings on the most frequent information processes and association between approach to learning and information literacy self-efficacy. The personality findings differed. Combining results for both studies helped confirm most of the information-behaviour profiles. Mapping the frequent information processes against requirements of practice indicated gaps, particularly around professional networking.

**Research limitations/implications** – As both studies were carried out at one higher education campus, further research to assess external validity is required.

**Practical implications** – Information-behaviour profiles, plus the mapping, help librarians and tutors develop tailored information literacy support that is clinically relevant and support transition to practice.

**Originality/value** – Validated a set of information behaviour profiles for nursing students and linked these to requirements of professional practice.

### Introduction

Information literacy for nursing undergraduate students should be guided by the demands of professional practice. In the UK, the [Nursing and Midwifery Council \(NMC\) \(2018, p. 9\)](#) that nurses must “always practise in line with the best available evidence. . . and make sure that any information or advice given is evidence-based”. A systematic review of the pedagogical strategies used in the teaching of evidence-based practice in nursing ([Aglen, 2016](#)) highlighted the need for students to learn professional discretion in solving ill-structured problems, to develop their critical thinking and elaborate on existing knowledge to be able to apply this to different situations – crossing the theory–practice divide. ## 插入引文及 參考文獻

### 方法1：EndNote「CWYW」功能

回到EndNote Library選取所需的書目資料，並透過「Cite While You Write〔CWYW〕」功能加入書目資料。

### 方法2：Word增益集「Insert Citation」功能

透過Word增益集「Insert Citation」功能，查詢關鍵詞並選取欲加入的書目資料。

★ 務必先將滑鼠游標移動到要插入引文的位置 ★

★ 可搭配鍵盤Shift和Ctrl一次插入多筆書目 ★

# 方法1：EndNote 「CWYW」

①先將游標放置於入參考文獻之位置

②回到EndNote Library

③選取書目資料，點選工具列 Tools>Cite While You Write>Insert Selected Citation(s)

目前市場上開放版機構提供傳統紙本有些則僅出版線上版機構而言，有些期刊相當時間後，才提供開放近用版。此外，亦有期刊採取所謂混合開放近用(open access hybrid)模式，由作者自己來決定是否將作品無開放給社會大眾閱讀。若作者做出開放近用的決定，則須支付相當費給出版機構。

就學術期刊經營者的觀點而言，開放近用經營模式的商業價值仍有待觀察，就財務的觀點而言，純粹開放近用的經營模式可節省行銷及訂戶管理的用，但是卻喪失了傳統經營模式主要的獲利來源：訂閱費用。目前大部分近用出版的經營費用係來自：出版機構的自有經費、外界捐贈、會員加值費用、作者所繳納的稿件處理費用及廣告收益等。此外，就稿件供給的觀點言，開放近用出版模式多要求作者繳納相當的稿件處理費用，此等要求可能影響作者提供稿件的誘因，該誘因的降低，對於尚未建立學術聲望的期刊而言，係屬不易處理的課題。

從作者的角度而言，開放近用的出版模式除了可增加讀者的數量以外，一個潛在的利益是作者可以得到更多關於其作品的回應，開放近用期刊的作者可以透過網際網路及資訊科技，為每一篇文章建立獻上論壇，另外，作者可以將其研究的基礎資訊，以不同的形式(如聲音、影片、數據、實驗筆及資料庫等)置於網站上供讀者檢驗參考，如此將可提升研究的準確性及速度；從讀者的角度而言，開放近用出版除了降低接近使用期刊的成本以外
