A close-up photograph of a person's hand holding a white tablet. The tablet screen displays a document with a light blue background. At the top, it says "1. Inspired by Nature". Below this, there is a paragraph of text and a small, detailed illustration of a spiral shell on the right side. The background of the image is blurred, showing what appears to be a desk or table.

ACM Digital Library 行動設備配對

註冊/登入個人帳號

點選首頁右上方的 SIGN IN / SIGN UP 註冊或是登入個人帳戶，登入後網頁右上方會顯示個人帳號名稱。

The screenshot shows the login and registration interface. On the left, the 'Sign in with your Web Account' section has a red box around the 'Web account' and 'Password' input fields, with a 'sign in' button below. A green box with an arrow points to this section, containing the text '已註冊個人帳戶由此登入個人帳戶'. In the center, the 'Create a Web account' section has a blue box around the 'Email Address' input field and a 'continue' button. A green box with an arrow points to this section, containing the text '輸入 email 開始註冊個人帳戶'. To the right of the registration form, there is explanatory text: 'ACM Membership is not required to create a free web account.' and 'If you are an ACM or SIG Member or subscriber, the email address you provide must match the one we have on file for you; this will enable you to take full advantage of member benefits.'

使用 ACM DL Mobile App (須先建立 ACM 個人帳號)

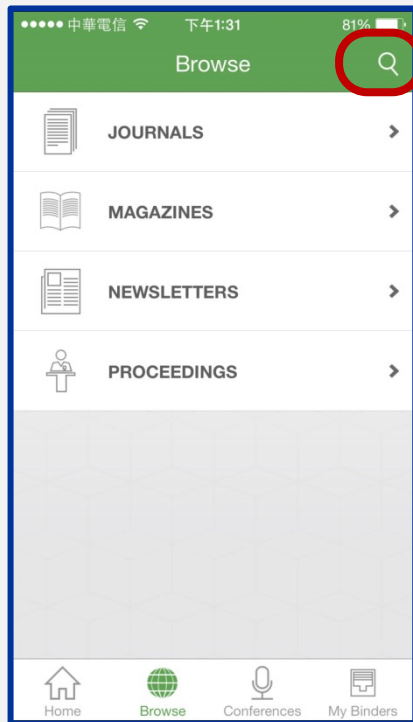

首先下載 ACM DL mobile app 並安裝好後，接著在校內的 IP 環境中，登入您的 ACM 個人帳戶，此舉將啟動個人帳戶的遠端登入機制。接著開啟 ACM Digital Library Mobile App，登入您的 ACM 個人帳戶後，即可透過遠端登入機制來使用學校所訂購的 ACM Digital Library 內容 (注意: 個人帳戶遠端登入機制開啟之後，每隔六個月，您需要重新進行上述步驟，以便重新認證啟動您的 ACM Digital Library 遠端登入功能)。

- 註冊一組 Web Account
- 淡江校園 IP 範圍內登入

Abstract

Adult multipotent stem cells have been isolated from a variety of human tissues including human skeletal muscle, which represent an easily accessible source of stem cells. It has been shown that human skeletal muscle-derived mesenchymal stem cells (hMDSCs) are muscle-derived mesenchymal stem cells that undergo osteogenic differentiation. Although hMDSCs can undergo osteogenic differentiation, they are not as efficient as human bone marrow mesenchymal stem cells (hBMSCs) in bone when genetically modified to express BMP2; it is therefore necessary to compare bone regeneration. The current study aimed to address this parallel comparison between hMDSCs and hBMSCs and bone regeneration capacities. Our results demonstrate that hMDSCs and hBMSCs had similar osteogenic-related gene expression profiles and osteogenic differentiation capacities *in vitro* when cultured in the presence of BMP2.
