Create change

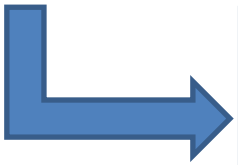
Global drivers

- University rankings & performance metrics
- Innovation and impact
- Open access and open scholarship
- Research integrity & data validation

The research (evaluation) landscape …

- Many countries have research evaluation programs
  - UK: RAE 1992-2008; REF from 2009
  - Hong Kong: RAEs in 1993, 1996, 1999, 2006 and 2014
  - Australia: ERA 2010, 2012, 2015, *2018*
- Increasing prominence of university rankings, and new rankings emerging:

  "Universities are increasingly confronted by a plethora of ranking and classification initiatives" - European University Association
- Increasing emphasis on engagement and impact beyond the scholarly



Impact 'locally' – within UQ there is keen focus on research quality & impact, & projects aimed at understanding collaboration

Open Access & Open Scholarship

A logo celebrating the tenth anniversary of the Budapest Open Access Initiative in 2012, featuring the Széchenyi Chain Bridge in Budapest.

Open data is good, because ...

SEPTEMBER 11, 2015 EXECUTIVE OFFICER, AOASG

Belinda Weaver writes on the many benefits of open data

Contact: Twitter @cloudaus

Why should we advocate for open data? What benefits does it bring?

e it. It helps if we have the data to back up our
es and visualises a lot of information which helps pierce
nples – the costs of the post-GFC UK bank bailout and
a great job of communicating a message, and the data

stralians can check on what governments are saying.

Open data makes things more efficient.

Disasters happen. In the helping phase, open data helps
elief agencies get the information they need to direct
perations on the ground. It helps governments get the
lans and details of the infrastructure they need to fix.

White House announces new US open-access policy

22 Feb 2013 | 19:25 BST | Posted by Richard Van Noorden | Category: Policy

In a long-awaited leap forward for open access, the US government said today that publications
taxpayer-funded research should be made free to read after a year's delay — expanding a policy
until now, applied only to biomedical science

RCUK Policy on Open Access

In June 2012 the report from the National Working Group on Expanding Access to Published Research Findings (the 'Finch Group') - *Accessibility, sustainability, excellence: how to expand access to research publications* was published. The report sets out an encouraging and challenging road map to improve open access to scholarly literature and the Research Councils have used the findings of the group to further develop the policies that they have had in place since 2005.

Research Integrity & Research Data Validation

Open access and research integrity are burning issues

and the necessary development of appropriate data infrastructures for instance; research integrity and the need to ensure responsible and sustainable data management to avoid misconduct; and implications for researchers' careers and the need to acknowledge that data-intensive research requires new and additional types of skills.

UQ eSpace

- ✓ UQ eSpace is ranked among the global top 20, and second in Oceania by The Ranking Web of World Repositories.
- ✓ It is the institutional repository for all publications, research datasets and other digitised materials created by staff of the University – many are open access.
- ✓ UQ eSpace makes UQ's research visible and accessible through global services, such as OAlster, Trove and Google.
- ✓ It has author level metrics via Altmetrics, Thomson Reuters and Elsevier and has integrated ORCiD, Publons and ResearcherID.

35733 Open Access items

Beyond bibliometrics...

Altmetric

altmetrics

about

altmetrics is the creation and study of new metrics based on the Social Web for analyzing, and informing scholarship.

Our vision is summarized in:

J. Priem, D. Taraborelli, P. Groth, C. Neylon (2010), Altmetrics: A manifesto, (v.1.0), 26 October 2010. http://altmetrics.org/manifesto

WHO…do we work with?

- Senior exec: VC (President) Office, Deputy Vice-Chancellor (Research), International office
- Heads of School, Faculty, Institute Directors
- Research managers and administration staff
- Research Committees
- Commercialisation Unit – UNIQUEST at UQ
- Individual researchers and research teams

The University Of Queensland
AUSTRALIA
Create change

Researchers and Research Groups

Metrics provide *supporting evidence* of claims individuals/research groups make

- Track record of individuals, groups of researchers
- Contribution to the discipline and/or significance of the contribution
- Evidence of international profile
- Evidence of capacity to collaborate effectively

The University Of Queensland
AUSTRALIA
Create change

Example: Industry Engagement

- What industries do UQ authors co-publish with?
  - *And what is the quality of those publications like?*
- What industries do academics in other Australian-based institutions co-author with?
  - *And what is the quality of those publications like?*
- What industries are acknowledged as a 'funder' of UQ publications?
  - *And what is the quality of those publications like?*

Collaborative Publications Reports

Information Report on Tamkang University Publications

May 2016

Part 1. Executive summary

1.1 Background information on Tamkang University publications 2011-2016 (Apr)

- For the period 2011-2016 (Apr) there are 1,216 publications (articles and reviews) indexed in InCites with Tamkang University in the Organizarion Name field (see p.5).
- In terms of joint co-authored publications, Australia is ranked 9th by productivity with 7 co-publications. USA is ranked 1st with 112 co-publications (see p.6).
- The top five institutions co-publishing with Tamkang University for the period 2011-2016 (Apr) ranked by number of publications are National Taiwan University; National Tsing Hua University; Academia Sinica – Taiwan; National Taiwan University of Science & Technology and National Central University (see p.10 & p.11).
- UQ has not co-published with Tamkang University since 2004.

THE UNIVERSITY OF QUEENSLAND
AUSTRALIA
Create change

SciVal

InCites™
Calibrate Your Strategic Research Vision

THOMSON REUTERS
Web of Science

1.2 Australian Institutions-Tamkang University co-publishing activity

Productivity

- From 2010 to 2016 (May) Tamkang University has co-published a total of 12 Web of Science indexed documents with other Australian Institutions (see p.15).

Subject Areas

- The main subject areas (Web of Science Subject Categories) covered in the Australian Institutions-Tamkang University co-publications for the period 2010-2016 (May) are Astronomy, Astrophysics and Statistics Probability (see p.16).

Funding Agencies

Funding agencies acknowledged in the Australian Institutions-Tamkang University co-publications for the period 2010-2016 (May) include: National Science Council of Taiwan; Academia Sinica - Taiwan; Ministry of Education Taiwan and the National Center for Theoretical Science and Center for Theoretical Sciences, National Taiwan University (see p.17)

5.3.4 UQ-Tamkang University Competencies

Tamkang University contributes to 5 of UQ's competencies. Tamkang University has no competencies listed as contributing in the top 10 institutions in UQ's competencies.

UQ competencies that include competencies where Tamkang University is a contributor (SciVal, Apr 2016)

Competency	UQ Authors
Absorptive capacity; Industry; Societies and institutions (DC37)	Green P.F., Heales J., Ali S.
Cultural distance; Psychic distance; Firms (EC84)	Brewer P.A., Venaik S., Liesch P.W.
Boards; Corporate governance; Firms (EC119)	Haq M., Pathan S., Faff R.W.
tourism; tourism development; Destination (EC158)	Ritchie B.W., Scott N., Ruhanen L.M.
Cycle; Complete graph; Graph in graph theory (EC234)	Smith B.R., Bryant D.E., Billington E.J.

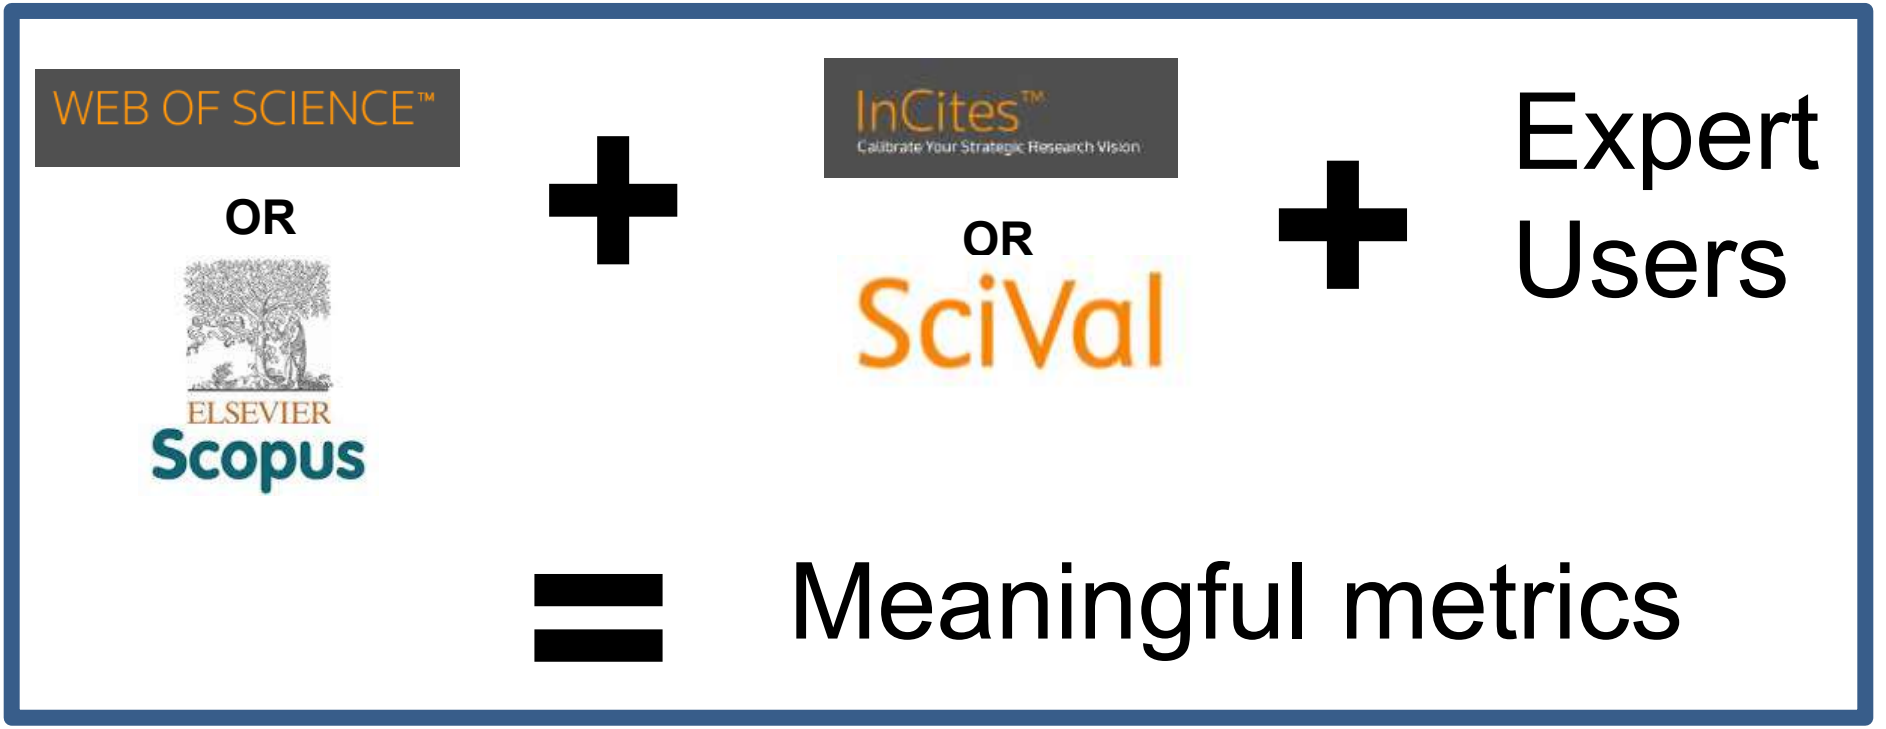
Best practice[1]

Users of InCites & SciVal are not 'bibliometricians'

- Care must be taken in ensuring that the information is relevant, meaningful, accurate, and appropriate and that caveats are well understood



[1]http://www.nature.com/news/bibliometrics-the-leiden-manifesto-for-research-metrics-1.17351

Translating these principles into a Service

At The University of Queensland Library we have a mature metrics service which provides reports and advice across all levels of the organisation.

THE UNIVERSITY OF QUEENSLAND
AUSTRALIA
Create change

Service Delivery & Training

UQL Model - Metrics Service, Levels of Provision 13 July 2015

Level 1: Specialist

A Specialist has expertise and knowledge in research evaluation & metrics tools, and keeps abreast of emerging issues

Develops & provides metrics training and support for CS Managers, Librarians & within UQ

Provides expert advice and tailored metrics reports for UQ Senior Executive and UQ International

Develops and recommends metrics data & benchmarks for inclusion in UQ systems (e.g. eSpace, UQreSEARCHers)

Engages, consults & liaises with external providers in relation to research evaluation initiatives

(e.g. Thomson Reuters HiCi researchers, ORCiD, Incites, Scopus Custom Data)

Is responsible for communication about metrics for UQ Libraries (website, Libnet, blog)

Level 2: Service Provision

A Level 2 Service Provider has a good working knowledge of metrics, including benchmarks

Can provide training & advice within their field, including conducting workshops

on metrics tools and related topics, including author identifiers

Can use Incites for summary metrics and article level benchmarking reports

Can provide support to Level 1 Specialists for data integrity checking of selected reports

Level 3: Awareness & Understanding, and Basic Service Provision

A Level 3 Service Provider can advise academics on what metrics tools are available &

how useful they are within their field, including author identifiers

Has good searching skills for metrics information using

Web of Science, Scopus , Google Scholar

Can help academics identify and find relevant metrics

including the h index and journal metrics;

Has an awareness of benchmarking tools, including

Essential Science Indicators, Scival and Incites

Research Publications Impact: Metrics

Information on research impact measures, including citation metrics, journal quality indicators, benchmarking, altmetrics and collaboration measures.

Metrics

Metrics, commonly referred to as bibliometrics, includes basic measures such as numbers of publications and the citation counts to them. As a broader topic, it can be include the h-index, journal quality metrics like the Impact Factor, collaboration metrics and citation impact measures.

Metrics are **discipline-specific** and **they vary over time**. It is therefore important that they are **used in context**, taking into account the discipline and timeframe under consideration.

- San Francisco Declaration on Research Assessment (DORA)
  In December 2012, the San Francisco Declaration on Research Assessment (DORA) was initiated by the American Society for Cell Biology together with a group of editors and publishers of scholarly journals in recognition of the need to improve the ways in which some metrics are used in research evaluation.

Welcome

This guide provides information about managing research data. It is intended for staff and students at the University of Queensland.

What is research data?

Research data are generated for different purposes and through a

What is research data management?

Effective research data management is a cornerstone of the responsible conduct of research.

It ensures that research data are managed according to legal, statutory, ethical and funding body requirements. Research Data Management covers the planning, collecting, organising, managing, storage, security, backing up, preserving, and sharing your data. Research data represents significant value to researchers and the University of Queensland, and good stewardship of research data is necessary to validate the outcomes of research, and maintain the integrity of research results.

Sound data management procedures can:

- Increase the efficiency of research
- Help guarantee the quality and authenticity of data
- Enable the exposure of research outcomes through collaboration and dissemination
- Provide for the reproducibility of experimental and computational outcomes

This guide provides the information data.

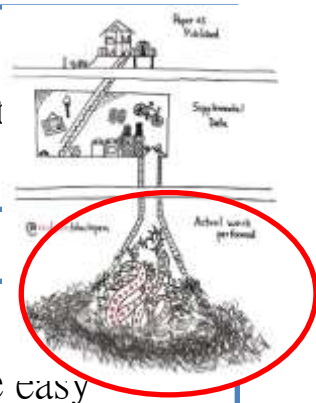
Why this iDMP Project? *(Taming the monster)*

Data Security and Confidentiality

- Know where and how data is stored, and who can access it; protect researchers ar research participants from data misuse or breaches.



Data Safety and Preservation

- Ensure data is not lost; manage version control, filing and other protocols; enable easy location and retrieval of data when needed.

Collaboration and Publication

- Facilitate data sharing and review, and ensure researchers meet necessary standards when submitting research papers and data for publication.

Metadata Collection and Usage

- Support a durable registry of projects across the University of Queensland

MEMBERS MAKE ORCID POSSIBLE!

2015 ORCID Taiwan Workshop

Our first ORCID workshop in Taiwan was held on 22 October 2015 in cooperationg with the National Taiwan Normal University and Interlibrary Cooperation Association (ILCA), and with the generous support of international and local sponsors. The workshop was part of ORCID's growing global outreach program, made possible as a result of a grant from The Leona M. and Harry B. Helmsley Charitable Trust.

UQ Researcher Identifiers

Researcher identifiers are unique codes to help differentiate between researchers with the same or similar name and ensure that you are getting credit for all of your work.

Here you can easily create researcher identifiers with the most commonly recognised tools in the scholarly community and link this identifier to your profile at UQ.

Track and Verify your Peer Review

Get a **verified record of your peer review work** you can use in promotion applications.

How it works

- Forward your "thank you for reviewing" emails to reviews@publons.com.
- We'll verify and add a record of your reviews to your public reviewer profile (see eg).
- All sensitive information is hidden by default to protect reviewer anonymity. You choose what to display.

Publons also partners with many of the world's top publishers to automatically credit reviewers. See our partners below.

As I do a lot of reviews I am quite a fan of Publons and I am pleased to see it being integrated into more UQ systems. The value for me is that when I claim that I provide service to the discipline by doing paper reviews I am now **able to substantiate this claim with evidence. This is useful for annual performance appraisals and promotion committees.**

– Associate Professor

"A good way to record the review work I did…. I fully support the idea of made it available to other UQ systems as the review I completed are engagement/contribution to the field and these outcomes should be counted towards my workload."

– Lecturer

"as with the Author Statistics site in general, I find this integration both very useful and very well implemented."

– Research Fellow

Whitelisting

Check for inclusion of the Directory of Open Access Journals

04

Blacklisting

Check for publisher and/or title inclusion on Beall's List of Predatory Publishers

05

Website Investigation

- Design should be professional and modular
- Check website is hosted by a reputable publisher or well known technology partner
- Journal should be indexed in a reputable database that is relevant to your discipline
- The list of issues & articles should be complete and easy to find
- Contact information is thorough and accurate
- Check Review Guidelines are clear and transparent

No university in the world has ever risen to greatness without a correspondingly great library... When this is no longer true, then will our civilization have come to an end.
