

未來大學圖書館的挑戰與合作

-以圖書館資訊系統為例

黃明居

國立交通大學教授兼圖書館副館長

06/16/2016

內容

2

- 圖書館資訊系統面臨的挑戰
- 未來資訊環境的趨勢
- 危機與轉機
- 開放性圖書館資訊系統環境（Kuali OLE）
- 結論

圖書館資訊系統面臨的挑戰

3

- 數位資訊環境改變迅速
 - 數位內容更加多元化
 - 電子書、電子期刊、電子雜誌、電子地圖、數位音樂、照片、動畫、3D模型、虛擬實境...
 - 資料格式不斷改變
 - DOC、PDF、ePUB、XML、GDF、WAV、MP3、GIF、JPEG、3DS、OBJ
- 圖書館主要的自動化系統，以處理（實體）圖書資料而設計，較無法因應大環境的改變

圖書館資訊系統面臨的挑戰（續1）

4

- 數位內容**載體與軟體**的改變迅速
 - 載體：讀者使用的終端數位內容載體，不斷更新
 - 個人電腦、平板電腦、電子書閱讀器、智慧型手機...
 - 軟體：讀者使用的閱讀、聆聽與學習的平台功能
 - 閱讀電子書或文章時的註記、社群心得分享....
- 圖書館資訊系統目前較無法滿足讀者終端軟硬體的需求，整合性較不足
 - 廠商各自開發，雖有共通標準（如電子雜誌），但不容易整合

圖書館資訊系統面臨的挑戰（續2）

5

- 與學校行政系統串接
 - 圖書與期刊採購模組與會計系統的串接
 - 學生註冊（報到）、休學或離校等與教務系統的串接
 - 機構典藏系統與研發系統的串接
 - ...
- 與學生學習系統串接
 - 選課系統、線上學習、學生學習履歷等系統的串接
 - ...
- 需要更具備擴充性，較具彈性的無縫串接機制功能

圖書館資訊系統面臨的挑戰（續3）

6

- 圖書館系統間的串接與合作機制不足
 - ▣ 目前圖書館系統大多處理本館的館藏
 - 雖有館際間的文獻傳遞或圖書互借服務，但資訊系統串接不容易
 - ▣ 聯合目錄建置不易
 - 目前NDDS系統，每年都需要各館上傳館藏資料
 - 一年更新一次，造成資料正確性不足
 - 臺聯大系統的作法：透過primo系統串接，館藏資料狀態正確
- 圖書館系統的资料格式，雖有國際的標準（MARC21、FRBR等），但整合性仍不足

新世代圖書館服務平台

7

- 新一代圖書館自動化方案的特色 (Marshall Breeding in “Beyond the ILS:A New Generation of Library Services Platforms”)
 - 完整地管理圖書館的資源，包含印刷、電子與數位化資源 (Comprehensive management of library materials including electronic, digital, and print.)
 - 原始設計就是以多租戶軟體型態提供雲端的軟體服務 (Designed to be deployed through multi-tenant software as a service.)
 - 書目與電子館藏是建立在可分享的知識庫上 (Reliance on shared knowledge bases for bibliographic and e-content holdings)
 - 服務為導向的架構 (Service-oriented architecture)
 - 網頁基礎為介面的館員工作環境 (Reliance on Web-based interfaces for staff functionality)

Library Services Platform

- **Library-specific software.** Designed to help libraries automate their internal operations, manage collections, fulfillment requests, and deliver services
- **Services**
 - ▣ Service oriented architecture
 - ▣ Exposes Web services and other API's
 - ▣ Facilitates the services libraries offer to their users
- **Platform**
 - ▣ General infrastructure for library automation
 - ▣ Consistent with the concept of Platform as a Service
 - ▣ Library programmers address the APIs of the platform to extend functionality, create connections with other systems, dynamically interact with data

Library Services Platforms – Functional

- Manages electronic and print formats of materials
- Replaces multiple incumbent products
- Extensive Metadata Management
 - MARC, Dublin Core, BIBFRAME, etc
- Multiple procurement workflows
 - Purchase, License, DDA
- Knowledgebases
- Built-in collection analytics

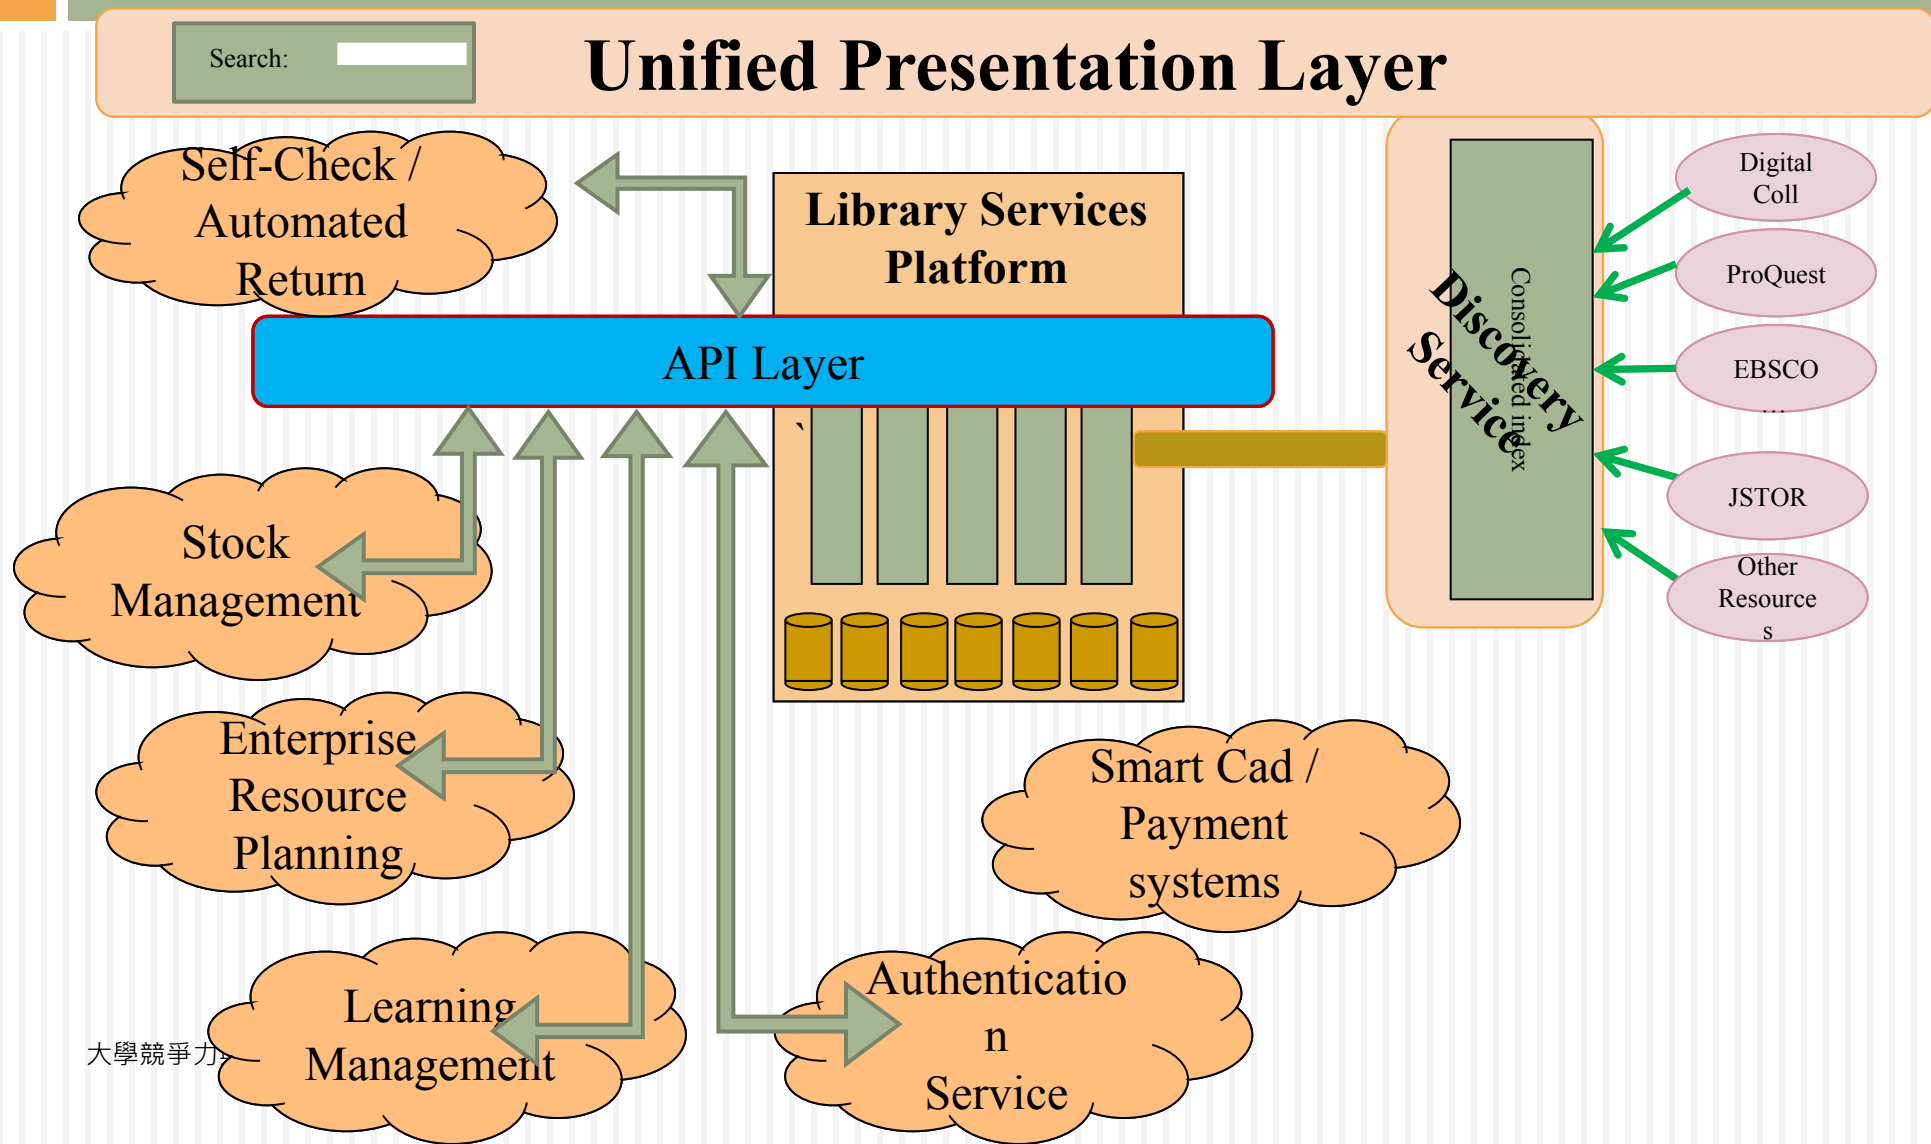

Library Services Platforms – Technical

- Beyond Client/Server Computing
- Multi-tenant platforms
- Web-based interfaces
- Services-oriented architecture
- Exposes APIs for extensibility and interoperability
- Interoperable

新世代圖書館服務平台管理模式

Library Services Platforms

Category	WorldShare Management Services	Alma	Intota	Sierra Services Platform	Kuali OLE
Responsible Organization	OCLC.	Ex Libris	ProQuest	Innovative Interfaces	Kuali Foundation
Key precepts	Global network-level approach to management and discovery.	Consolidate workflows, unified management: print, electronic, digital; Hybrid data model	Knowledgebase driven. Pure multi-tenant SaaS	Service-oriented architecture Technology uplift for Millennium ILS. More open source components, consolidated modules and workflows	Manage library resources in a format agnostic approach. Integration into the broader academic enterprise infrastructure
Software model	Proprietary	Proprietary	Proprietary	Proprietary	Open Source

危機即是轉機

13

□ 危機

□ 圖書館資訊系統面臨前所未有的挑戰

- 資訊大環境的改變迅速

□ 圖書館經費的刪減

- 建置下一代資訊系統經費嚴重不足

□ 轉機

□ 新世代圖書館資訊服務平台的開放資源

- 合作共同建置與營運
- 資源分享更加緊密（如聯合目錄）

FUNCTIONALITY BY MODULE

Select and Acquire module

16

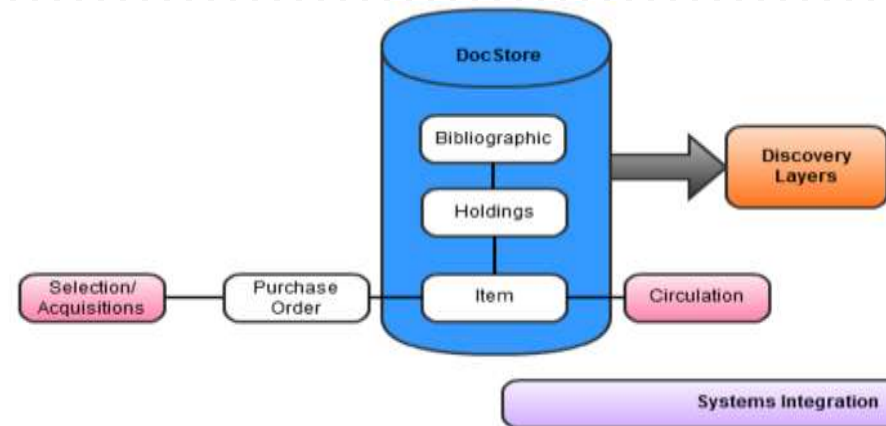

- Encompasses Financial, Selection, Acquisitions, Receiving, Payment/Invoicing, Licensing, and Electronic Resource Management (ERM)
- Supports operational processes for demand-driven acquisitions of library resources

Describe and Manage Module

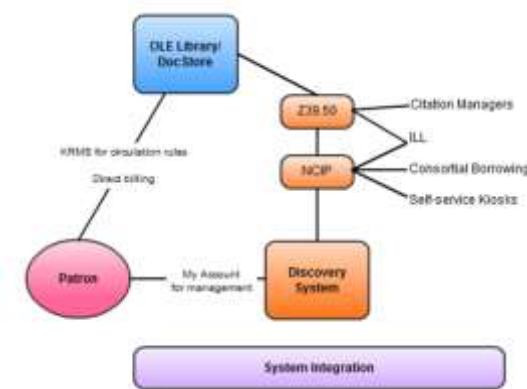

17

- “Cataloging” is the term most commonly used in academic libraries for what OLE defines as Describe and Manage activities.
- OLE’s user-friendly interface allows library staff to create and manage core metadata relating to library resources such as bibliographic data, localized holdings, and electronic resources access information.

Deliver Module

18

- ❑ Covers the interactions between the library, its collection, patrons and discovery systems and provides the basic features/functions to manage these processes.
- ❑ OLE circulation is based on the ability to link patron data to item data in various combinations under various circumstances and conditions.
- ❑ OLE allows any library to select a wide range of options to meet local circulation policy requirements, e.g., patron-related blocks, item-related blocks, loan periods, notice types and notice frequency, etc.

Systems Integration

19

- Link between the modules
 - Select and Acquire, Describe and Manage, Deliver, and Kualiti Rice
- A common middleware suite built as a service oriented architecture (SOA).
- Design of interoperability with institution-wide applications such as: Identity management, acquisitions/financial accounting, course and learning management, and student information systems.

結論

20

- 圖書館面臨無數的挑戰與困境
 - 資訊環境快速改變
 - 經費與資源逐年減少
 - 需要更加積極面對挑戰
- 化危機為轉機
 - 合作與聯盟，參與OLE開發？
- 台灣圖書館界需要建置合作且共享的雲端化資訊系統
 - 符合各圖書館需求
 - 資源分享更加有效率且合作更密切
 - 永續發展
